Premier North American Insights

Provide detailed location data for every neighborhood and every city in the United States and Canada with a population over 10,000 people.

What we offer

Communicating the Market Value of Each Location

The Location Score Widget is a unique insight and marketing tool for online real estate and travel websites. Your customers make decisions based on three things: Price, Quality and Location. The Location Score Widget reveals the value of each individual location by the characteristics, amenities and features that matter to your clients. This location data allows your clients to understand which properties are right for them, so you can focus on closing the deal.

Comprehensive, Up to Date, Essential Location Data

The Location Score Widget showcases up to 17 distinct Location Scores that matter to your clients when they are evaluating a specific property. These Location Scores are ranked for each individual location on a 0-5 scale, allowing for clear visualization, understanding and comparison. Supporting information including Business Listings, Transit Routes, Travel Times and Distances is also provided in the Widget.

→ Find the Demo here: <https://www.locallogic.co/en>

Flexible Pricing

The Location Score Widget is priced based on the number of listings on your website. We offer flexible pricing with tier discounts.

Fast and Easy Implementations

The Location Score Widget is a white label product that can be integrated into your existing website with just two lines of code! It will match the look and feel of your site and integrate seamlessly. Talk to us about Widget formats and pick the one that is best for you.
